

Hosted **Email Security** Service

Protecting your Business

FEATURE HIGHLIGHTS

- Highly effective detection system blocks over 99% of spam
- Unique record masking technique conceals email servers from the public internet
- Fail Safe Service engages automatically whenever connectivity to your email server is lost due to planned or unplanned outages

With the goal of providing affordable and effective technology solutions to our clients, **Network PhD** has partnered with McAfee to offer an email security solution without the investment in additional hardware or software.

How Network PhD's Hosted Email Security Service helps you

- Automatically block spam, viruses, phishing scams, and other malicious emails before they reach your premises
- Prevent inbound and outbound¹ email threats from impacting your network and end users
- Save bandwidth and server storage capacity by stopping spam and email based threats before they infiltrate your network
- Email storage for up to five days reducing the loss of valuable emails due to a network or server outage
- 24/7 monitoring² of incoming email for proactive defense against the latest attacks
